

CYBER ATTACK INSURANCE

In this digital day and age, stories of Identity Theft and the loss of consumers' personal information are becoming more and more commonplace, it's comforting to know that Cyber Attack Insurance exists.

Not only does it exist, but Orange Coast Title Company and it's family of companies were among the first title companies in the Nation to obtain this coverage, and have carried it since the beginning of 2013!

What is Cyber Attack Insurance?

In the event that OCT 's computer and information systems are attacked and NPPI (Non-Public, Personal Information) is compromised, this insurance provides coverage against liability resulting from identity theft as required by Federal law. Cyber Attack Insurance also provides credit monitoring services to those parties whose information may have been affected by a security breach. Cyber extortion and cyber terrorism are covered under this insurance, as well as various other scenarios that can potentially arise from a cyber attack.

Our Cyber Attack Insurance has been reviewed and deemed acceptable under the federal Dodd Frank Act by an independent auditor.

The Orange Coast Title family of companies makes SECURITY a priority along with providing the best Customer Service and title products available today!

Thank you for choosing the Orange Coast Title family of companies for all your title needs!
