Property Profile QR Code

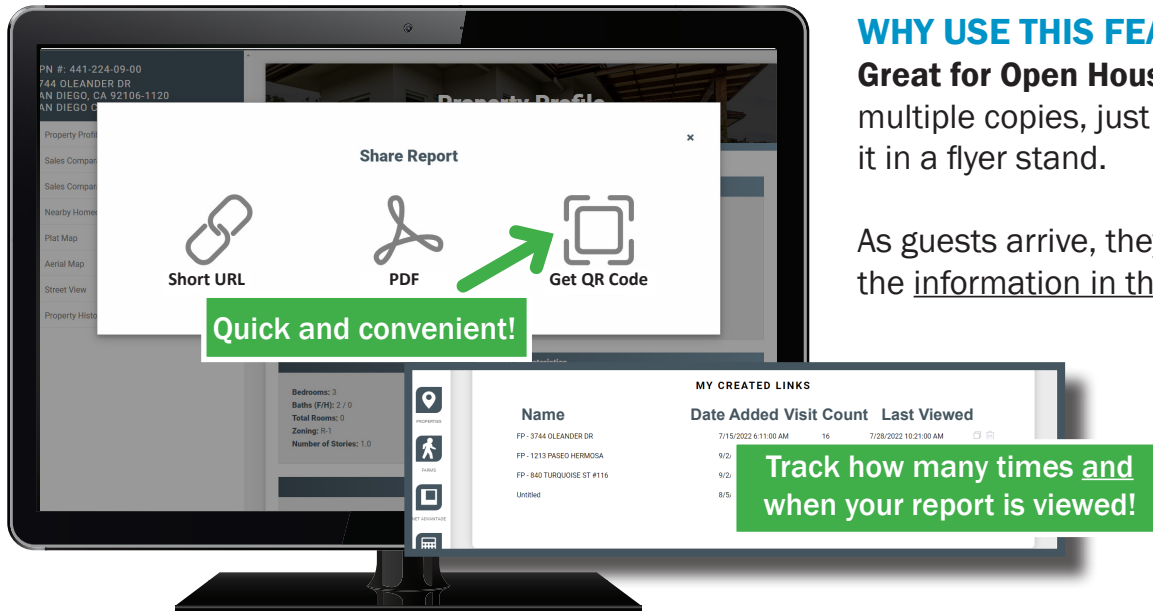

Share Report
QR Created

Download View Print

California Title already offers great ways to share property reports! You can print, convert to a PDF, or create a “Short URL” to share a direct link to the report.

Now, you can create a **QR code** to share **Property Profiles** with your client(s)!

WHY USE THIS FEATURE?

Great for Open Houses! – Instead of printing multiple copies, just print one flyer and place it in a flyer stand.

As guests arrive, they can scan it and have the information in the palm of their hand!

HOW DO I FIND THE QR CODE FOR MY PROPERTY PROFILE?

1. **Create** a property report like a property profile
2. Click the “**Share**” button
3. Choose **QR Code** (you may also choose short URL, or PDF)
4. If you choose QR code, you have the option to download, view, or print it! (**Printing the QR code will print it as a flyer**).
